DETAILED ACTION

1. Applicant's preliminary amendment filed on 12/21/2004 is acknowledged and entered.

Election/Restrictions

Species Election

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Claims 4 and 5 (in combination) recite following species of polymers used for obtaining enhanced dissolution of the composition as claimed:

Eudragit E100, and

Hydroxy-propyl methyl cellulose.

Applicant is required, in reply to this action, to **elect a single specie of the polymer** (that allows enhanced dissolution of the composition as claimed), to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply **must also identify the claims readable on the elected specie**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1651

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 4 and 5 (in combination) recite all of the species set forth in the election above and will be examined in light of the elected specie.

Claims 1-3 and 9-15 are deemed generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Jung et al (WIPO document, WO 99/33467) teach the use of polymers that allow enhanced dissolution of bioactive compounds that are poorly soluble, in the method and composition of an oral preparation of the drug, itraconazole (see Jung et al, abstract, pages 1 and 7, tables 1 and 10, and claims, in particular). Since, the instant claims do not make a contribution over the prior art. Therefore, the instant claims lack a special technical feature which distinguishes them over the PRIOR ART.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Pursuant to PCT Rule 13.2 and PCT Administrative Instructions, Annex B, Part 1(f)(I)(B)(2), the species are not art-recognized equivalents.

Art Unit: 1651

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
